

Faculty of Engineering and Geological Sciences

Computer and Systems Engineering Department

Two Full Time Position in Software Engineering in the area of Computing and Informatics or related

The Department of Computing and Systems Engineering of the Universidad Católica del Norte is looking for two full-time academic vacancy in the area of computer science. We are looking for candidates with a good research record and with educational competence within the field of software engineering (improvements of software system processes and/or software and information security).

Provide high-quality education for both bachelor and master students in the field of software engineering, with a clear commitment to the quality of the programme as a whole. The professor is expected to contribute to basic undergraduate courses. It is also expected to contribute to the faculty's and the university's pedagogical mission through the supervision of student projects (e.g., thesis projects) and by acting as a supervisor of Master students.

Requirements for Candidate 1

- Doctorate degree in Computing/Informatics or related.
- Specialization in the area of Software Engineering.
- Scientific productivity demonstrated through WoS publications.
- Experience in University Teaching and/or Industry related.
- Proficiency in English is required.

Requirements for Candidate 2

- At least a Master degree in Computing/Informatics or related.
- Professional experience in software project management and development of at least 4 years.
- Desirable work experience in University Teaching and/or Industry related.
- Proficiency in English is required.
- Preferably female gender.

Background required to apply

- Curriculum vitae.
- Copies of the most relevant publications.
- Two letters of recommendation.
- Legalized copy of titles and degrees.

It is offered

- Depending on your record and qualifications, you will be appointed to one of the grades of the senior academic staff: assistant professor, associate professor, or full professor.
- Economic incentive for scientific publications according to quartile and indexing.

The evaluation of the antecedents will be carried out by the Council of the Academic Unit. The Council may request a personal interview and a psychological evaluation to applicants without previous experience within the university academic environment. **You can apply for this job no later than August 15, 2022.**
